

Cut-Resistant

HyFlex® 11-501 Glove

Lightweight Fit & Feel, Superior Cut Protection.

Great fit and safety come together.

The HyFlex® 11-501 glove features Intercept Technology® jointly developed by Ansell and DuPont. The exclusive DuPont™ Kevlar® Stretch Armor provides all-day comfort with EN 388 Level 4 / ANSI Level 4 high cut protection. Combined with a lightweight, ergonomic design, it gives workers the natural fit, safety and dexterity they need when working with sharp materials.

The power to achieve more.

The incredible cut protection and relaxed fit provided by the HyFlex® 11-501 glove enables your workers to perform their job safely and efficiently. Whether working in light oil or dry environments, workers have outstanding flexibility and dexterity when handling sharp parts, knives or other objects.

Outstanding Product Attributes & Benefits

Intercept Technology® with Kevlar® Stretch Armor exclusively from Ansell

- Enhanced cut protection reduces the risk of injury and related expenses
- EN 388 Level 4 / ANSI Level 4 cut protection

11-501	Intercept technology™ yarn liner, foam nitrile palm coated, teal	6 (XS), 7 (S), 8 (M), 9 (L), 10 (XL)	144 Pairs / Case

Ansell HyFlex® Line

The HyFlex® 11-501 glove is part of the HyFlex® Cut-Resistant range. The HyFlex® glove line is comprised of four premium performance ranges: Precision, Cut-Resistant, Oil-Repellent, and Specialty products. Products that provide "cut resistance" and "cut protection" do not completely prevent or eliminate the potential for cuts and punctures, and are not intended or tested to provide protection against powered blades or other sharp or rotating equipment. Users are encouraged to always use caution and care when handling sharp metals. For a comprehensive review of our Precision Protection™ line visit www.ansellcanada.ca or call 1 800 363-8340 and speak to a customers service representative.
